Art Unit: 2625

1. Claims 1-16 are pending. Claim 1, 10, 11, and 13 are independent.

2. The following quotations of 37 C.F.R. § 1.75(d)(1) is the basis of objection:

(d)(1) The claim or claims must conform to the invention as set forth in the remainder of the specification and the terms and phrases used in the claims must find clear support or antecedent basis in the description so that the meaning of the terms in the claims may be ascertainable by reference to the description. (See § 1.58(a)).

3. Claims 3-6 are objected to under 37 C.F.R. § 1.75 as failing to conform to the invention as set forth in the remainder of the specification.

Claims 3 and 5 both recite "said relative movement between the array and the object is deliberately induced". The phrase "deliberately induced" is not found in the specification. It is unclear as in what the term is referring to in the specification.

4. Claims 3-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 3 and 5 both recite "said relative movement between the array and the object is deliberately induced". The relative movement, between the array and the object, being deliberately induced, is not described in the specification, since the phrase "deliberately induced" is not found in the specification. It is unknown as in exactly what deliberately induced relative movement is.

Art Unit: 2625

Claims 4 and 6 are rejected as being dependent on rejected claims 3 and 5, respectively.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1, 2 and 9 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 11 and 12 of U.S. Patent No. 6,631,015. Although the conflicting claims are not identical, they are not patentably distinct from each other for the reasons given below.

Claim 1 is corresponded to by patent claim 11 by anticipation. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the claim 1 method based on patent claim 11.

Claim 2 corresponds to patent claim 2.

Claim 9 is corresponded to by patent 11 by anticipation since patent claim 11 recites "Moiré patterns are reduced". Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to provide the method of claim 9 based on patent claim 11.

7. Claims 7 and 8 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 11 and 12 of U.S. Patent No. 6,631,015 in view of well known art.

Regarding claim 7, Patent No. 6,631,015 claim 11 discussed above for claim 1 does not claim an array comprising plural rows of sensor. The examiner took Official Notice of the fact that color scanners having three rows of sensor for red, green and blue colors, respectively, are well known in the art. It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute the array of

Art Unit: 2625

patent claim 1 with a color sensor array comprising three tows of sensor to in order to

read color information from a color original.

The claim 8 limitation is corresponded to by patent claim 12.

8. Claims 10-16 are allowed.

9. The following is an examiner's statement of reasons for allowance:

Obviousness type double patenting is not found between claims 10-16 and the

claims of Patent No. 6,631,015.

Any comments considered necessary by applicant must be submitted no later

than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on

Statement of Reasons for Allowance."

10. The prior art made of record and not relied upon is considered pertinent to

applicant's disclosure.

Rhoads (U.S. Patent No. 6,320,680)

11. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Cheukfan Lee whose telephone number is (571) 272-

7407. The examiner can normally be reached on 9:30 a.m. to 6:00 p.m., Mon-Fri.

Art Unit: 2625

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward L. Coles can be reached on (571) 272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.

/Cheukfan Lee/ Primary Examiner, Art Unit 2625
